

"The system worked flawlessly through all obstacles... Thank you for making a product that works well."

Captain Albert Rickwalt, MCLB Fire Department

Portable Wireless Headset Systems

Firecom's portable wireless headset system brings all the functionality of our vehicle-mounted systems together in a convenient, weatherproof case.

Rugged and reliable headsets offer hands-free, full-duplex communication with hearing protection and superb noise-canceling microphone technology. The portable intercom unit interfaces with virtually any radio using Firecom's Mobile Radio Interface cable.

The system includes all necessary chargers and components. Up to 12 wireless headsets and a battery-powered portable ComHub™ are enclosed in a rolling Pelican Hardigg™ Storm Case™ for easy transportation and storage.

APPLICATIONS include:

- Fireboats
- Backline and specialty vehicles
- Interior command posts
- Radio procedure training
- Incident command
