FIRECOM COMMUNICATION SYSTEMS

Since 1989, Firecom has had the privilege of helping firefighters and first responders to communicate clearly, whether in the apparatus, while training, or on a rescue.

From our completely wireless headsets to our rugged, durable intercom systems, Firecom has built the most trusted name in the industry by continuously taking firefighter feedback to develop innovative products.

IMPROVE SAFETY, EFFICIENCY, AND PROTECT HEARING WITH A GRAB-&-GO PORTABLE WIRELESS SYSTEM

- No installation required – turn on and go
- Hands-free, full-duplex wireless team communications
- Headsets minimize background noise for enhanced clarity and focus
- 24db noise reduction rating
- Option to integrate handheld radios with PTT
- 24-hour battery life

MAINTAIN YOUR SITUATIONAL AWARENESS

With Firecom's Listen-Through technology, your crew can hear their surroundings without removing hearing protection.

- Stay connected to your team, radio, and what's going on around you
- Decipher which direction ambient sounds are coming from
- Maintain awareness of traffic & pedestrians from the cab
- Communicate with the public, police, recovery teams or anyone in your proximity, even if they're not wearing a headset
- Control how much sound to let in - hear the traffic on an extrication, back-up signal from your apparatus, or others shouting on scene

MIX WIRED & WIRELESS HEADSETS INTO YOUR APPARATUS' INTERCOM SYSTEM

Build your system with any combination of wired and wireless headsets. Hands-free, full-duplex communication with your crew and simple PTT radio operation.

- Operates with a stand-alone intercom system or
- integrated with up to 4 mobile radios
- Flexible design brings all crew members into constant communication
- Monitor both mounted and portable radios at the same time

Call us to spec and configure a custom solution for your engine, pumper, ambulance, command vehicle, wildland, tiller, other aerials and more.

LIGHTWEIGHT, HANDS-FREE COMMUNICATION

Whether in the ambulance or incident command vehicle, reduce communication errors and delays with FIRECOM CONNECT. Great for use in EMS, HazMat, command, drone, rescue and other situations where clear communication is needed without full hearing protection.

- Use your own headphones, earbuds or speaker (Bluetooth/wireless or wired)
- Lightweight, portable, watertight
- 24-hour battery life
- 800-foot range
- Reduce communication errors and delays with real-time, full-duplex team audio

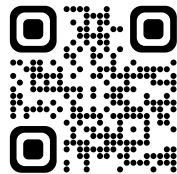

Our customer service team is based in the US, ready to answer your call.

We're proud to share our industry-leading service team in the building ready to take your call.

Whether specifying new apparatus, installing intercoms in existing equipment, or replacing communication gear — our team is here to answer your questions, hear your comments, and earn your trust. When you choose Firecom, you're not only getting the most rugged and dependable communication system, but first-class service and support.
