

NEW FIRECOM CONNECT

BRING THE WHOLE TEAM TOGETHER

-  DECT7 wireless or wired connection
-  Bluetooth or wired connection
-  Wireless radio connection
-  Device worn or carried by user

FIRECOM CONNECT

The lightweight and portable Connect pairs to a personal Bluetooth device and the Base Station/ComHub. It's the most flexible way to join the conversation with your team.

PERSONAL HEADPHONES OR BLUETOOTH SPEAKER

Use your own ear buds, bone conducting headphones or nearly any 2-way Bluetooth device to communicate with your team.

FIRECOM BASE STATION / COMHUB

The Base Station or ComHub offers untethered mobility for Connect and Firecom headsets. Flexibly move between teams, vehicles and locations while staying connected via radio or intercom.

FIRECOM DIGITAL INTERCOM

The Digital Intercom integrates up to 4 radios with the Firecom system for ultimate communications. Radio, Cell, Aux and crew comms all in one solution.

FIRECOM WIRELESS HEADSET

Wireless headsets offer crystal clear comms and NFPA compliant hearing protection. Listen-Through brings in ambient sounds at safe levels for situational awareness.

PORTABLE RADIO

Add a handheld radio to Firecom's portable ComHub to monitor radio channels and team comms all through your Connect or headset.

MOBILE RADIO

Monitor and transmit on land mobile radios using Firecom Connect and Firecom headsets with PTT. Integrates with nearly all land mobile radios.
